Turbo Drying Unit: This system provides better drying performance for your dishes.

Technical specifications

Capacity	15 place settings
Height	820 mm - 870 mm
Width	598 mm
Depth	550 mm
Net Weight	38 kg
Electricity input	220-240 V, 50 Hz
Total Power	1900 W
Heating Power	1800 W
Pump Power	100 W
Drain Pump Power	30 W
Water supply pressure	0.03 MPa (0,3 bar)-1 MPa (10 bar)
Current	10 A

SAFETY INFORMATION AND RECOMMENDATIONS

Recycling

- Certain components and the packaging of your machine have been produced from recyclable materials.
- Plastic parts are marked with international abbreviations: (>PE< , >PS< , >POM<, >PP<,)
- Cardboard parts have been produced from recycled paper and they should be disposed of into waste paper collection containers for recycling.
- Such materials are not suitable for being disposed of into garbage bins. They should be delivered to recycling centres instead.
- Contact relevant centres in order to obtain information on methods and points of disposal.

Safety Information

When you take delivery of your machine

- Check for any damage to your machine or to its packaging. Never start a machine damaged in any way, make sure to contact an authorised service centre.
- Unwrap the packaging materials as indicated and dispose of them in accordance with the rules.

The points to pay attention during machine installation

- Choose a suitable, safe and level place to install your machine.
- Carry out the installation and connection of your machine by following the instructions.
- This machine should be installed and repaired by an authorised service person only.
- Only original spare parts should be used with the machine.
- Before installing, be sure that the machine is unplugged.

- Check whether the indoor electrical fuse system is connected according to the regulations.
- All electrical connections must match the values indicated on the rating plate.
- Pay special attention and be sure that the machine does not stand on the electricity supply cable.
- Never use an extension cord or a multiple socket for making a connection. The plug should be comfortably accessible after the machine has been installed.
- After installing the machine to a suitable place, run it unloaded for the first time.

In daily use

- This machine is for household use; do not use it for any other purpose.
- For commercial usage please refer to warranty card.
- Do not stand on, sit on or place heavy loads on the open door of this dishwasher, as it may fall over or damage the door.
- Never put into the detergent and rinse aid dispensers of your machine anything other than those detergents and rinse aids which are produced specifically for dishwashers. Blanco will not be responsible for any damage that might occur in your machine otherwise.
- The waste water from this appliance is not drinkable.

- Due to danger of explosion, do not put into the machine's washing section any chemical dissolving agents such as solvents.
- Check whether plastic items are heat-resistant before washing them in the machine.
- Young children should be supervised to ensure that they do not play with the appliance.
- Do not put into your machine those items which are not suitable for dishwashing. Also, do not fill any basket above its capacity. **AWARD** will not be responsible for any scratch or rust to form on the inner frame of your machine due to basket movements otherwise.
- Because hot water may flow out, the machine door should not be opened under any circumstances while the machine is in operation. In any case, a safety device ensures that the machine stops if the door is opened.
- Please do not leave the door open as this will cause a tripping hazard.
- Place knives and other sharp-ended objects in the cutlery basket in blade-down position.
- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- The appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervised or instruction concerning the use of the appliance by a responsible person for their safety.

• If EnergySave option is selected as "Yes", The door will be opened at the end of the program. Do not force to close the door to avoid damaging the auto door mechanism.

The door must be open during 30 minutes to get effective drying.(in models with auto door opening system)

Warning: Do not stand in front of the door after the signal sounds for the auto-open.

For your children's safety

• After removing the machine's packaging, make sure that the packaging material is out of reach of children.

• Do not allow children to play with or start the machine.

• Keep your children away from detergents and rinse aids.

• Keep children away from the machine while it is open because there may still be residues of cleaning substances inside the machine.

• Be sure that your old machine does not pose any threat to your children. Children are known to have gotten themselves locked in old machines. To forestall such a situation, break your machine's door lock and cut off the power plug.

In case of malfunctioning

• Any malfunction in the machine should be repaired definitely by qualified persons. Any repair work performed by anyone other than the authorised service personnel will cause your machine to be left outside the scope of warranty.

• Prior to any repair work on the machine, be sure that the machine is cut off from the mains. Switch off the power and unplug the machine. Do not pull by the cable when unplugging. Make sure to turn off the water tap.

Recommendations

• For energy and water saving, remove coarse residues on your dishes before placing the dishes into the machine. Start your machine after having fully loaded it.

- Use the pre-wash programme only whenever necessary.
- Place such hollow items as bowls, glasses and pots into the machine in such a way that they will face down.
- You are recommended not to load into your machine any dishes different or more than indicated.

Items not suitable for dishwashing:

- Cigarette ashes, candle leftovers, polish, paint, chemical substances, iron-alloy materials;
- Forks, spoons and knives with wooden or bone, or ivory or mother-of-pearl handles; glued items, items soiled with abrasive, acidic or base chemicals.
- Plastic items that are not heat-resistant, copper or tin-coated containers.
- Aluminium and silver objects (they may discolour, become dull).
- Certain delicate glass types, porcelains with ornamental printed patterns as they fade even after the first wash; certain crystal items as they lose their transparency over time, adhered cutlery that is not heat-resistant, lead crystal glasses, cutting boards, items manufactured with synthetic fibre;
- Absorbent items as sponges or kitchen rags are not suitable for dishwashing.

Warning: Take care to buy dishwasher-proof sets in your future purchases.

INSTALLING THE MACHINE

Positioning the machine

When determining the place to put your machine on, take care to choose a place where you can easily load and unload your dishes.

Do not put your machine in any location where there is the probability for the room temperature to fall below 0°C.

Before positioning, take the machine out of its packaging by following the warnings located on the package.

Position the machine close to a water tap or drain. You need to site your machine, taking into consideration that its connections will not be altered once they are made.

Do not grip the machine by its door or panel in order to move it.

Take care to leave a certain clearance from all sides of the machine so that you can comfortably move it back and forth during cleaning.

Make sure that the water inlet and outlet hoses do not get squeezed while positioning the machine. Also, make sure that the machine does not stand on the electrical cable.

Adjust the machine's adjustable feet so that it can stand level and balanced. Proper positioning of the machine ensures problem-free opening and closing of its door.

If the door of your machine does not close properly, check if the machine is stable on the floor it stands; if not, adjust the adjustable feet and ensure its stable position.

Water connection

Be sure that the indoor plumbing is suitable for installing a dishwasher. Also, fitting a filter to the water supply entering the appliance can reduce staining and the formation of deposits.

Water inlet hose

Do not use the water inlet hose of your old machine, if any. Use the new water inlet hose supplied with your machine instead. If you are going to connect a new or long - unused water inlet hose to your machine ,run water through it for a while before making the connection. Connect the water inlet hose directly to the water inlet tap. The pressure supplied by the tap should be at a minimum of 0.03 Mpa and and at a maximum of 1 Mpa.If the water pressure is above 1 Mpa,a pressure-relief valve should be fitted inbetween.

After the connections are made, the tap should be turned on fully and checked for water tightness.For the safety of your machine, make sure to always turn off the water inlet tap if left unused for long periods of time.

This appliance comes with an Aquastop hose. Do not allow the hose to get twisted or kinked.

Water outlet hose

The water drain hose can be connected either directly to the water drain hole or to the sink outlet spigot. Using a special bent pipe (if available), the water can be drained directly into the sink via hooking the bent pipe over the edge of the sink. This connection should be at a minimum of 50 cm and at a maximum of 110 cm from the floor plane.

Warning: When a drain hose longer than 4 m is used, the dishes might remain dirty. In that case, our company will not accept responsibility.

Electrical connection

The earthed plug of your machine should be connected to an earthed outlet supplied by suitable voltage and current. If there is no earthing installation, have a competent electrician carry out an earthing installation. In case of usage without earthing installed, our company will not be responsible for any loss of usage that might occur.

The indoor fuse current value should be 10A.

Your machine is set according to 220-240 V.

The machine should not be plugged in during positioning.

Always use the plug and cord supplied with your machine.

The machine's electrical cable should be replaced by an authorised service or an authorised electrician only. Failure to do so may lead to accidents.

In order not to cause an electric shock, do not unplug when your hands are wet.

When disconnecting your machine from the mains supply, always pull from the plug. Never pull the cord itself.

PREPARING THE MACHINE FOR USE

Prior to using the machine for the first time

- Check whether the electricity and supply water specifications match the values indicated by the installation instructions for the machine.
- Remove all packaging materials inside the machine.
- Fill the rinse aid compartment.

Warning: Some dishwasher detergents are strongly alkaline.

They can be extremely dangerous if swallowed. Avoid contact with skin and eyes and keep children away from the dishwasher when the door is open.

Detergent usage

Use a detergent specifically designed for use in domestic dishwashers.

You can find powder, gel, and tablet detergents in the market that have been designed for household dishwashers.

Detergent should be put into the compartment prior to starting the machine. Keep your detergents in cool, dry places out of reach of your children.

Do not fill detergent into the detergent compartment more than required; otherwise it may cause scratches on your glasses as well as lead to a poorly dissolved detergent.

Should you need more information concerning the detergent you will use, contact detergent manufacturers directly.

Filling the detergent compartment

Push the latch to open the detergent container as shown in the image. **1** Detergent pod has level lines inside. It is possible to measure the right detergent amount using these lines. Detergent pod can take totally 40 cm³ detergent.

Open the dishwasher detergent and pour into

the larger compartment **b** 25cm³ if your dishes are heavily soiled or 15cm³ if they are less soiled. **2** If your dishes have been kept dirty for a very long time, if there are dried food wastes on them, and if you have a overly loaded the dishwasher, pour **a** 5cm³ detergent into the pre-wash compartment and start your machine.

You may have to add more detergent into your machine, depending on the degree of soil.

Combined detergent

Detergent manufacturers also produce combined detergents called “2 in 1”, “3 in 1” or “5 in 1” etc.

“2 in 1” detergents contain detergent or rinse aid. When using “2 in 1” detergents make sure to check the specifications of the tablet.

Other tablet detergents contain detergent + rinse aid + various extra functions.

Generally, combined detergents produce sufficient results under certain usage conditions only. Such detergents contain rinse aid in preset amounts.

Points to consider when using this type of products:

- Always make sure to check the specifications of the product you will use or whether or not it is a combined product.

- Observe the instructions on packagings when using such products.
- If such detergents are in the form of tablets, never put them into the interior section or the cutlery basket of the dishwasher. Always put the tablets into the detergent compartment in the detergent dispenser.
- They produce good results for certain types of usage only. If you are using this type of detergents, you need to contact the manufacturers and find out about the suitable conditions of use.
- When the conditions of use of such products and the machine settings are appropriate, they ensure savings in rinse aid consumption.
- Contact the detergent manufacturers if you are not obtaining good wash results (if your dishes stay calcareous and wet) after having used 2 in 1 or 3 in 1 detergents. The scope of warranty for your machine does not cover any complaints caused by the use of these types of detergents.

Recommended usage: If you want to obtain better results while using combined detergents, add rinse aid into your machine and adjust the rinse aid setting to the lowest position.

Solubility of the tablet detergents produced by different companies can vary depending on the temperature and time. Therefore, it is not recommended to use such detergents in short programs. It is more suitable to use powder detergents in such programs.

Warning: Should any problem, which you have not encountered before, arise with the use of this type of detergents, contact the detergent manufacturers directly.

When you give up using combined detergents

- Fill the rinse aid compartment.
- Run an empty-wash.
- Make the suitable rinse aid setting

Filling with rinse aid and making the setting

Rinse aid is used to prevent the stay of white water drops, lime stains, white film strip-shaped stains that may form on the dishes, as well as to increase the drying performance. Contrary to the popular beliefs, it is used not only for obtaining shinier dishes but also for obtaining sufficiently dried dishes. For this reason, care should be taken that there is adequate amount of rinse aid in the rinse aid compartment and only polishing material produced for use at dishwashers should be used.

If the rinse aid lamp on the control panel comes on fill the rinse aid compartment with rinse.

To put rinse aid in, remove the rinse aid compartment cap by turning it. **1** Fill the rinse aid compartment with rinse aid until the rinse aid level indicator becomes dark. **2** refit the cap and close it by turning it in a way that the nails will correspond to one another. By checking the rinse aid level indicator on the detergent dispenser, you can understand whether or not your machine needs rinse aid. A dark indicator **2** means that there is rinse aid in the compartment, while a light indicator **1** shows that you need to fill the compartment with rinse aid.

The rinse aid level adjuster can be set to a position between 1 and 6. Factory setting for rinse aid is the position **3**. You need to increase the degree of the adjuster if water stains form on your dishes after a wash, whereas you need to decrease the degree if a blue stain is left when wiped by hand. **3**

Warning: Use only those rinse aid materials which are allowed for use in the machine. As rinse aid residues left as a result of overflowing will create extremely high amounts of foam and thus reduce the washing performance, remove the excess amount of rinse aid by wiping it with a rag.

LOADING YOUR DISHWASHER

If you properly place your dishes into the machine, you will be using it in the best way in terms of energy consumption, washing and drying performance.

There are two separate baskets for you to load your dishes into your machine. You can load into the lower basket such round and deep items as pots with long handles, pot lids, plates, salad plates, cutlery sets.

The upper basket has been designed for tea plates, dessert plates, salad bowls, cups and glasses. When placing long-stem glasses and goblets, lean them against the basket edge, rack or glass supporter wire and not against other items. Do not lean long glasses against one another or they cannot remain steady and may receive damage.

It is more appropriate to locate the thin narrow parts into the middle sections of baskets.

You can place spoons among the other cutlery sets in order to prevent them from sticking to one another. You are recommended to use the cutlery grid in order to obtain the best result. To avoid any possible injuries, always place such long-handle and sharp-pointed dishes as serving fork, bread knife etc. with their sharp points facing down or horizontally on the baskets.

Warning: Place your dishes into your machine in a way that they will not prevent the upper and lower spray arms from spinning.

Top basket

Height Adjustable Rack

These racks are designed to increase the capacity of the top basket. You can place your glasses and cups on the racks. You can adjust the height of these racks. Thanks to this feature, you can place different sizes of glasses under these racks.

Thanks to height adjustment plastics mounted on the basket, you can use your racks in 2 different heights. In addition, you can place long forks, knives and spoons on these racks laterally, so that they do not block the revolution of popeller.

Foldable racks on the upper basket are designed in order to let you place big items easier such as pots, pans, etc. If requested, each part can be folded separately, or all of them can be folded and larger spaces can be obtained. You can use foldable racks by raising them upwards, or by folding down.

Top basket height adjustment while it is full

Basket height adjustment mechanism on the top basket of your machine is designed to let you adjust the height of your top basket upwards or downwards, without removing it from your machine when it is full, and create large spaces at the top or bottom area of your machine as needed. Basket of your machine is set to upper position in factory settings. In order to raise your basket, hold it from both sides and pull it upwards. In order to lower it, hold it from both sides again, and leave it.

In loaded basket adjustment mechanism, make sure that both sides are in the same position (up or down).

Upper Cutlery Basket

The upper cutlery basket is designed for you to place forks, spoons and knives, long dippers and small items.

Because it can easily be taken out of the machine, it allows your dishes to be taken out of the machine along with the basket after washing.

The Upper Cutlery Basket is composed of two pieces; if you need to make space for the dishes in the upper basket, you can take out the left or right part of the upper cutlery basket in order to obtain more space.

Warning: Knives and other sharp objects must be placed horizontally in the cutlery basket.

Lower Basket
Folding Racks

Folding racks consisting of four parts that are located on the lower basket of your machine are designed in order to let you place big items easier such as pots, pans, etc. If requested, each part can be folded separately, or all of them can be folded and larger spaces can be obtained. You can use folding racks by raising them upwards, or by folding.

Electricity consumption (kW hours)	1,22-1,8	1,12-1,3	0,81-0,96	1,55	1,07	0,79	0,88	0,02	1,75
Water consumption (liters)	12,3-24,6	10,9-18,5	10,6-17,7	15	11	13,5	11	4,2	22,7

Warning : Short programs do not include a drying step.

The values declared above are the values obtained under laboratory conditions according to relevant standards. These values can change depending on conditions of product's use and environment (network tension, water pressure, water input temperature and environment temperature). To be able to reach the indicated energy and water consumption values; Eco 50 C programme must be carried out without any extra options and the Energy Save option must be on.

**Energy Save option is ON for the Eco 50 C programme. Eco programme is for a normally soiled load.

GETTING FAMILIAR WITH YOUR MACHINE

1.) Power On/Off Button

When the Power On/Off button is pressed, end of program indicator starts lighting.

2.) Program Display

Program display indicates the times of the programs and the remaining time during the program flow. You can also follow-up the selected programs by this display.

3.) Program selection button

With the program selector button, you can select a suitable program for your dishes.

4.) Delay Timer Button

You can delay the start time of a selected program for 1-2 ...19 hours by pressing the delay timer button of your machine. When you press the delay timer button, delay "1h" appears on the program display. If you continue pressing the delay timer button, 1-2... 19 will be displayed respectively. You can activate the delayed start by selecting the delay time and the desired washing program with the *program selection* button. It is also possible to select the program first and the delayed start afterwards. If you want to change or cancel the delayed start time, you can adjust it with the delay timer button; it will be activated according to the last value entered.

5.) 9bYf[mIGUj Y

Energy save option activates door opening system at the end of the program. Auto door opening system provides required drying performance at low rinsing temperatures and reduces energy consumption.

6.) Prewash Buton

If you select an extra pre-washing program, you improve washing performance. When you select pre-washing, since it improves washing performance, it changes the temperature and washing time of some programs.

Note: When a program which is not compatible with the pre-wash program is selected, a buzzer sound is heard indicating that the selected program is not compatible with the pre-wash option.

Note : If you will only make pre-washing, select prewash program with program selection button.

7.) 1/2 Half Load Button

Using the function 1/2 , three sorts of washing up can be done those being lower basket, upper basket and both baskets.

If you have little amount of dishes in your machine and if you have to wash them, you can also activate the semi-filling function in some of the programs additionally. If you have dishes in both baskets, press the key 1/2 and select the position in which both lamps are highlighted.

If you have dishes only in the upper basket, press the key 1/2 and select the position in which the upper lamp is illuminated. Thus, washing up shall be done only on the upper basket of your machine. No dishes should certainly be available in the lower basket while using this feature.

If you have dishes only in the lower basket, press the key 1/2 and select the position in which the lower lamp is illuminated. Thus, washing up shall be done only on the lower basket of your machine. While using this feature, make sure that there are no dishes in the upper basket.

Note : If you have used an extra feature on the latest washing program, this feature will remain active also on the next washing program. If you do not want to use this feature on the newly selected washing program, press the selected feature button again, and check that the lamp on the button goes off.

Note: When you select an incompatible program with the half load button, a buzzer sound is heard which indicates that the selected option is not compatible.

8.) Dck Yf cb indicator

When user presses Power On/Off button, machine is energised. As long as the machine is on, power indicator turns on.

Rinse aid Lack Warning indicator

In order to check that there is sufficient rinse aid in your machine check rinse aid lack warning light on the display. When rinse aid warning light starts coming on , fill in rinse aid chamber.

End of Program Indicator

End of program indicator on the control panel turns on when the selected washing program is completed .Your machine also gives a buzzer sound for "5 times" when the program is completed.

SWITCHING ON THE MACHINE AND SELECTING A PROGRAMME

Switching on the machine

1

Machine is energized when the On/Off button is pressed , two dashes appear in the program display and the end of program indicator turns on.

1/2

3

When you select a program with the program selection button, the program you select (P1,P2,etc) appears on the program display and the end of program indicator turns off.

1. Press the Power On/Off key.
2. Select the program suiting your dishes via the Program Selection button.
3. If you prefer or wish to prefer , you can choose additional function.
4. Close door. The program starts automatically.

Note: If you decide not to start to machine after selecting the program , just press the on/off button. Your machine will become ready for the new program selection when you press on/off button again. You can select the new program by pressing the program selection button.

Program follow-up

Do not open the door before the program ends.

End of program indicator on the control panel turns on when the selected washing program is completed .Your machine also gives a buzzer sound for "5 times" when the program is completed.

Changing a programme

If you would like to change programs while a washing program is continuing.

Open the door and select a new program by pressing the program selection button.

After closing the door , the new program started will resume the course of the old program.

Note: When the door of the machine is opened in order to stop the washing program before it is completed first open the door slightly in order to avoid water spillage.

Changing a programme with resetting

If you would like to cancel a program while a washing program is resumed

Open the door of your machine.
The last selected program will
appear on the screen.

Keep the program selection button pressed for
3 seconds. End of program indicator flashes
and "1" is indicated on the program display.

Discharge process starts after closing the
door of the machine. The machine
discharges the water in it for about 30
seconds. When the program is
cancelled, your machine gives a buzzer
sound for "5 times" and the "end of
program indicator" turns on.

Note: When the door of the machine is opened in order to stop the washing program before it is completed first open the door slightly in order to avoid water spillage.

Switching the machine off

When end of program indicator
turns on, switch your machine off
by using the Power On/Off button.

Pull the plug out of the outlet.
Turn off the water tap.

Note: After the buzzer sound which indicates the end of the program when the washing program comes to an end (end indicator light is on), you can leave the door of your machine ajar in order to hasten the drying.

Note: If the machine door is opened during washing or the power is cut off, the machine will resume the program when the door is closed or the power is back.

MAINTENANCE AND CLEANING

Cleaning the machine in regular intervals prolongs the machine's service life.

Oil and lime may accumulate in the machine's washing section. In case of such accumulation;

-Fill the detergent compartment without loading any dishes into the machine, select a programme that runs at high temperature, and start the machine. In case of insufficiency, use special cleansing material available in the market. (Cleansing material produced special to machines by detergent producers.)

Cleaning the seals in the machine door,

-To clean any accumulated residues in the door seals, wipe the seals regularly by using a dampened cloth.

Cleaning the machine,

Clean the filters and spray arms at least once a week.

Unplug your machine and turn off its tap before starting the cleaning.

Do not use hard materials when cleaning your machine. Wipe with a fine cleaning material and a dampened cloth.

Filters

Check if any food wastes have remained on the coarse and fine filters. If any food wastes are left, remove the filters and clean them thoroughly under the water tap.

- a. Micro Filter
- b. Coarse Filter
- c. Metal/Plastic Filter

To remove and clean the filter combination, turn it counter clockwise and take it out by lifting upwards. **1**

Pull and remove the metal/plastic filter. **3** Then pull the coarse filter out of the micro filter. **2** Rinse it with lots of water under the tap. Refit the metal/plastic filter. Insert the coarse filter into the micro filter in a way that the marks will correspond to one another. Attach micro filter into the metal/plastic filter and turn to the direction of arrow and it is locked when the arrow on micro filter can be seen from across. **4**

- Never use your dishwasher without any filter.
- Incorrect fitting of the filter will reduce the washing effectiveness.
- Clean filters are very important in terms of the proper running of the machine.

Spray arms

Check whether or not the holes for the upper and lower spray arms are clogged. If there is any clogging, remove the spray arms and clean them under water.

You can remove the lower spray arm by pulling it upwards, while the upper spray arm nut can be removed by turning the nut to the left.

Be sure that the nut is perfectly tightened when refitting the upper spray arm.

Hose filter

Water is prevented by the inlet hose filter so as to avoid any damage to your machine because of any contamination (sand, clay, rust etc.) that might be occasionally carried in through the mains water supply or the indoor plumbing, and to forestall such complaints as yellowing and formation of deposits after washing. Check the filter and the hose from time to time and clean them if necessary. To clean the filter, first turn off your tap and then remove the hose. After removing the filter from the hose, clean it under the tap. Insert the cleaned filter back into its place inside the hose. Refit the hose.

FAILURE CODES AND WHAT TO DO IN CASE OF FAILURE

ERROR CODE	ERROR DESCRIPTION	CONTROL
F5	Inadequate water supply	<ul style="list-style-type: none"> • Make sure the water input tap is totally open and that there is no water cut. • Close the water input tap, separate the water input hose from the tap and clean the filter at the connection end of the hose. • Restart your machine, contact the service person if the error resumes.

F9	Divisor position error	Contact the service person.
F6	Faulty heater sensor	Contact the service person.

If one of program monitor lights is on and start/Pause light is on and off,

Your machine's door is open, shut the door.

If the programme won't start

- Check if the plug is connected.
- Check your indoor fuses.
- Be sure that the water inlet tap is turned on.
- Be sure that you have closed the machine door.
- Be sure that you switched off the machine by pressing the Power On / Off button.
- Be sure that the water inlet filter and the machine filters are not clogged.

If the control lamps won't go out after a wash operation

The *Power On/Off* button is released yet.

If detergent residues are left in the detergent compartment

Detergent has been added when the detergent compartment was wet.

If water is left inside the machine at the end of the programme

- The water drain hose is clogged or twisted.
- The filters are clogged.
- The programme is not finished yet.

If the machine stops during a wash operation

- Power failure.
- Water inlet failure.
- Program can be on standby mode.

If shaking and hitting noises are heard during a wash operation

- Dishes placed incorrectly.
- Spray arm hitting the dishes.

If there are partial food wastes left on the dishes

- Dishes placed incorrectly into the machine, sprayed water did not reach related places.
- Basket overly loaded.
- Dishes leaning against one another.
- Very small amount of detergent added.
- An unsuitable, rather weak wash programme selected.
- Spray arm clogged with food wastes.
- Filters clogged.
- Filters incorrectly fitted.
- Water drain pump clogged.

If there are whitish stains on the dishes

- A very small amount of detergent is being used.
- Rinse aid dosage setting at a very low level.

If the dishes won't dry up

- A programme without a dry operation selected.
- Rinse aid dosage set too low
- Dishes unloaded too fast.

If there are rust stains on the dishes

- Stainless-steel quality of the dishes washed is insufficient.
- Unhealthy mains grounding.

Call an authorised service if the problem still persists after the controls or in case of any malfunction not described above.

PRACTICAL AND USEFUL INFORMATION

1. Whenever you will not be operating your machine
 - Unplug the machine and then turn the water off.
 - Leave the door slightly ajar in order to prevent the formation of unpleasant smells.
 - Keep the machine interior clean.
2. Eliminating water droplets
 - Wash the dishes with the intensive programme.
 - Take all of the metal containers in the machine out.
 - Do not add detergent.
3. If you properly place your dishes into the machine, you will be using it in the best way in terms of energy consumption, washing and drying performance.
4. Clean all rough waste before you place dirty dishes to the machine.
5. Operate the machine after it is completely full.
6. Use pre-washing program only when necessary.
7. Observe program information and average consumption values table when selecting a program.
8. Since the machine will reach high temperatures, it should not be mounted near refrigerator.
9. If the appliance is located in a place where the risk of freezing exists, you must completely drain the water that has remained in the machine. Turn off the water tap, disconnect the water inlet hose from the tap and allow the interior water to drain.
